Figure 1: Login Page

The login page provides a clean and simple interface for users to enter their email and password. The page includes a “Remember Me” checkbox for user preference. Email and password fields are designed with large touch targets, and a registration link is provided for new users. The login button is clearly labeled, and appropriate response messages are displayed for successful login or errors.

2.2. Registration Form Page

Figure 2: Registration Form Page

The registration form provides step-by-step guidance. The first step collects basic information (name, email, phone) and the second step requires a password and confirmation. Each field has real-time validation, a password-strength indicator, and a mandatory terms checkbox. Previous/Next buttons guide navigation, and the user is redirected to the login page after success.

2.3. Main Dashboard Home Page

Figure 3: Main Dashboard Home Page

The dashboard home page summarises all important information for farmers. A welcome message displays the user's name, quick-access cards link to Market Prices, Weather, and Disease Detection, and the latest recommendations appear in a card layout. Weather conditions and key statistics are highlighted at the top, and the page is fully responsive on mobile.

2.4. Crop Market Information Page

The screenshot shows the 'Market Prices' section of the Smart Farmer Assistant. It includes a search bar for crops or regions and a table of current market prices. The table lists five crops: Rice (Boro), Wheat, Tomato, Potato, and Onion, each with its price, unit, region, and a trend indicator.

Crop Name	Price	Unit	Region	Trend
Rice (Boro) ধান (বোরো)	৳32	per kg	Khulna	↗️ +5%
Wheat গম	৳28	per kg	Dhaka	↘️ -2%
Tomato টম্যাটো	৳45	per kg	Jessore	↗️ +8%
Potato আবু	৳22	per kg	Rangpur	↘️ -3%
Onion পেঁয়াজ	৳35	per kg	Rajshahi	↗️ +10%

Figure 4: Crop Market Information Page

The crop market page displays current market prices for all available crops in table and card format, including name, price, unit, and region. A search bar helps users find specific crops, buying/selling price comparisons are shown, and price trends are displayed with trend lines alongside the latest update time.

2.5. Weather Information Dashboard

Figure 5: Weather Information Dashboard

The weather dashboard displays current conditions in a card layout, with temperature, humidity, and rainfall shown in large fonts and weather icons for quick reference. Flood-risk level is shown with a colour-coded bar (green/yellow/red), a 7-day forecast is presented as a line chart, and users can select a region to view.

2.6. Disease Detection & Diagnosis Page

Figure 6: Disease Detection & Diagnosis Page

The disease detection page provides an upload area for images of affected crops. After upload, the AI model automatically detects the likely disease and displays it with a confidence level, along with symptoms, treatment, and prevention information. Recommended medicines and practices are listed, users can report diseases, and a loading spinner keeps image processing responsive.

2.7. AI Recommendations Center

Figure 7: AI Recommendations Center

The recommendations center centralises all AI-generated suggestions and alerts. Each recommendation is labelled with a priority level (high/medium/low) and can be marked as read. A filter lets users view specific recommendation types, each item explains why it is relevant, and alerts show a clear timeline with required actions.

2.8. User Profile Management Page

Figure 8: User Profile Management Page

The profile page displays personal information (name, email, phone) with an Edit Profile modal for updates and a profile-picture upload with cropping. The Account Settings tab covers password changes and security preferences, recent login history/active sessions are shown, and account deletion requires confirmation.

2.9. Mobile Responsive Navigation

Figure 9: Mobile Responsive Navigation

On mobile, navigation uses a hamburger icon that opens a slide-out menu containing links to all main features, with the user-profile section at the top and logout clearly visible at the bottom. Menu items are touch-friendly, the menu can be closed via the cross icon or by tapping outside, and transitions are smoothly animated.
